

# REACT Project

## Qualification System in Energy Efficiency in Buildings

### Final Conference | 16 December 2021

#### WE SUCCESSFULLY FINISHED THE REACT PROJECT!

The Project culminated after held:

Pilot Training Courses

Multiplier events

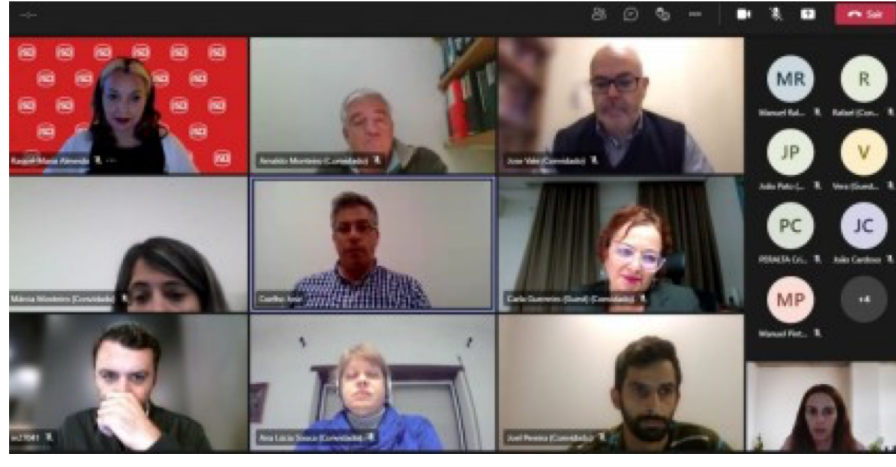

Final Conference

Final Project Meeting

### PILOT TRAINING COURSES

Total of 32 participants attended REACT Pilot Training Courses in Portugal, Greece and Croatia. Overall, in all three countries the participants were satisfied with the quality of the presented materials and gathered knowledge on practical examples as well as the combined approach of learning.

In all of the countries participants recognized the potential of the materials and suggested the further use of qualification on national levels.

#### CROATIA

- 5 participants
- **CU1** "Basics of energy efficiency"
- **CU2** "Technologies for energy efficiency,"

„useful material since they are based on real work situation.”  
„would recommend to VET providers.”

#### GREECE

- 7 participants
- **CU3** „Methodologies for the application of Audit Methods”
- **CU4** „Monitoring of Energy Efficiency in Buildings,”

„that parts of the content can be used in other related sectors.”

#### PORTUGAL

- 20 participants
- **CU2** „Technologies for Energy Efficiency in Buildings”
- **CU4** „Energy Efficiency Monitoring in Buildings”

„Participants made the process of adapting the course to the national context more viable, effective, and sustainable in the long term.”

### MULTIPLIER EVENTS

#### „THE IMPORTANCE OF EDUCATION FOR ENERGY EFFICIENCY AND SUSTAINABLE CONSTRUCTION”

The event in Croatia was held on 3rd of November and gathered 36 participants. Beside presenting REACT Project outputs, the participants were provided with practical example of mobile nZEB house, study tour visits to nZEB and low-energy buildings at the REA North's headquarters surroundings.

#### NATIONAL OUTREACH SEMINAR FOR STAKEHOLDERS

The event in Greece was held 2-4 November and gathered 17 participants. It was used to present the learning tools and experiment with the game linked to learning to VET providers as well as networking with civil engineering and energy efficiency stakeholders from Thessaloniki.

### FINAL CONFERENCE AND FINAL PROJECT MEETING

Due to COVID-19 pandemic, both events were held online although were initially planned to be held in person.

1

The Final conference was held on 16th of December and had around 45 participants throughout the day. The purpose was to overview the activities that were held in Project partner countries (Portugal, Greece and Croatia) by the partners, OesteSustentável, ISQ, ISQe, SEERC and REAN within the REACT Project.

Interesting testimony was presented by one of the participants in the pilot course in Portugal, sharing her first-hand personal experience.

One of the highlighted presentations was by the Portuguese agency Erasmus+, about the challenges posed by the Green Deal and how the Erasmus + Program can help overcome these challenges.

Throughout the day, several presentations related to innovative projects in the field of energy efficiency in buildings were also held, with the participation and interaction between the speakers and the participants.

2

Final Project Meeting was held the day after, on 17th of December, where among other agreed fine-tuning activities was to provide this 6th and final REACT Project newsletter you are reading at the moment.
